

BYZANTINO

Traditional sophisticated lime paint

DESCRIPTION

Natural paint, based on aged slaked lime, with exceptional anti-mould properties, for interior and exterior use.

APPLICATION FIELDS

It can be used on any porous new wall surface, which is not painted. Not suitable for surfaces on which an acrylic or other material has been applied, which has made them non-porous / waterproof (eg emulsion paint, oil paint ...). It is available in white colour, or in a large number of colour shades, based on a special color palette.

CHARACTERISTICS/ ADVANTAGES

- Vapour permeability of the surface
- No fungus /mould
- Very strong adhesion
- Special highlights and a lack of uniformity in the shade of the colour that make the surface look more natural
- Long lasting

PRODUCT INFORMATION

Packaging: 10 lt plastic containers

Storage: To be stored in a shadowed place and avoid exposure to very high temperature or frost (optimum storing temperature: 5°C to 35°C).

Maximum storage time in intact packaging: 12 months after production date

APPLICATION INFORMATION

Coverage:

Approximately 12 – 14 m² /lt, for each layer, depending on the substrate

APPLICATION INSTRUCTIONS

- Certainly wear protective gloves and eye-protection - glasses.
- Stir the product thoroughly before use .
- The product can either be applied as it is, or diluted up to 10 % with water .
- It can be applied using a brush or a roller , depending on the desirable result.
- It is recommended that you apply two or more layers of different shades, in order to create the patina or the antique wall effect.
- Start with darker colours and finish with lighter ones
- Wait for at least 12 hours between layers, depending on the environmental conditions .
- For an optimum protection of the end surface, you can use the special wax-based varnish VELVET WAX

HEALTH, SAFETY & ENVIROMENTAL PROTECTION

Detailed information and instructions regarding the safe management of the product and in matters of Health & Safety, are provided in the most recent Safety Data Sheet (SDS), copies of which are available on the company's website www.marmoline.gr or upon request.

LEGAL NOTICE

We guarantee the quality of all our products, based on their technical specifications, as described in the Declaration of Performance (CE) and this Technical Data Sheet. Such guarantee refers only to the products that we deliver for use and never to its application or final result, which largely depends on the experience and quality of work of each user and on the application conditions. The user is advised to test the product on a small scale, and if he is satisfied with the result, then to use the product on large scale in his project. All data stated in this Technical Data Sheet are based on laboratory tests. The really measurable data might differentiate due to conditions that are not subject to our control. The recommendations and implementation instructions must be considered by the user as indicative, and always with given that the product has been traded and traded and stored according to its instructions. As it is not possible to control the parameters/conditions of its application product in practice, no guarantee is provided for the final result of each application. Consequently, no legal liability of the Company can be established based on the information and instruction given in this Technical Data Sheet. The Company reserves the right to modify data listed in this Product Data Sheet, with no previous warning. Users must refer to the latest version of the product Technical Data Sheet.
